Fundamentals Enhanced

Audience: Fundamentals Enhanced is designed for RNs, RPNs and NPs with an interest in developing their capacity related to hospice palliative care in a clinical setting.

Fundamentals Enhanced is a prerequisite for the CAPCE Program. While not all learners will go on to take the CAPCE program, this is an opportunity to learn more about the role of the CAPCE Resource Nurse.

Objectives:

- To provide support and guidance for nurses to utilize their skills and palliative knowledge more effectively
- To learn from the experiences of practiced hospice palliative care leaders in a relaxed, safe and informal learning environment
- To discuss possible future learning opportunities

Other things to Note:

Since completion of the Fundamentals of Hospice Palliative Care program is a pre-requisite for Fundamentals Enhanced, applicants currently enrolled in the “Core” Fundamentals program may still participate, as long as they complete their Core Fundamentals requirements, prior to the start of the Enhanced program.

Applicants who have completed the “Classic” (8-session) Fundamentals HPC program (before September 2015), will require additional reading materials for the Enhanced stream, which will be provided at no cost. **Also, applicants will be asked to provide proof that they have completed the Fundamentals of HPC program.**
